<u>No Confidence in the Dean of Life Science, Jonathan Bacon</u>
<u>Re: Proposed Department of Chemical Biology</u>

We, the undersigned, have <u>no confidence</u> in Jonathan Bacon, the Dean of Life Science, due to his poor management and the decision to refocus the department of Chemistry into the department of Chemical Biology. This highlights the trend of financial and academic mismanagement at Sussex that has been the focus of the Sort US Out campaign by the Student Union.

We oppose the proposed closure ("refocus") of chemistry, and we condemn the way in which the decision has been reached – without any academic input.
